## Protecting your Pets in the HEAT

According to <http://www.humanesociety.org> The summer months can be uncomfortable—even dangerous—for pets and people. It's difficult enough simply to cope with rising temperatures, let alone thick humidity, but things really get tough in areas that are hit with the double blow of intense heat and [storm-caused power outages](#), sometimes with tragic results.

We can help you keep your pets safe and cool this summer. Follow our tips for helping everyone in your family stay healthy and comfortable when the heat is on (and even if the power isn't).

### Provide ample shade and water:

Any time your pet is outside, make sure he or she has protection from heat and sun and plenty of fresh, cold water.

In heat waves, add ice to water when possible. Tree shade and tarps are ideal because they don't obstruct air flow. A doghouse does not provide relief from heat—in fact, it makes it worse.

Keep your pet from overheating indoors or out with a cooling body wrap, vest, or mat (such as the Keep Cool Mat). Soak these products in cool water, and they'll stay cool (but usually dry) for up to three days. If your dog doesn't find baths stressful, see if she enjoys a cooling soak.

## Maintenance Corner

### Quick reminder about cooking grease:

Please remember that you should **NEVER** put any type of cooking Fats, oil and grease down a drain, garbage disposal or flush it down a toilet. This will cause issues with pipes, not only the pipes in your home but your neighbors as well. It seems like a liquid when it's hot, but as soon as this grease hits the drain, it cools and congeals, becoming pipe-clogging wax. Scrape it into the trash, or, if it's clean bacon fat, save it in a jar for reuse.
